QUADCO

As a true visionary and pioneer in the forestry industry, Quadco embraces quality craftsmanship, business relationships, and loggers needs. Incorporated in 1989, we are recognized worldwide for revolutionizing the forestry industry through development of the Quad Tooth System® as well as other valuable products used by loggers every day.

Our mission is to manufacture world class cutting systems to fulfill our customers' needs, provide satisfying careers for all employees, and earn a fair return. We are continuously improving in order to create partnerships with our customers for a collective successful future.

Log Max

Since 1980, Log Max has been designing and manufacturing machines in the heart of the Swedish forest district. Log Max is proud to serve the forestry industry with superior grapple harvesters for a variety of carriers, designed and made in an in-house assembly line that prioritizes communication, flexibility, and rigorous testing.

Log Max strives for a customer-centric approach, taking your feedback into account with each improvement and upgrade we make to our machinery. For forty-two years, Log Max has supported the forestry industry, and we look forward to doing so for many more.

SOUTHSTAR

Southstar has a simple mission; to be industry leaders in forestry attachments by providing world-class products for global conditions.

This is achieved through progressive design, service, and listening to our customer requirements as we create low-maintenance, heavy-duty machinery that embodies efficient, high-quality performance while remaining affordable.
